A Letter of Hope for the Solar Industry

I know for many this is a time of true hardship and in some cases pain both personally and professionally, and I want to acknowledge this reality. For all those who are suffering, scared and uncertain of the future, my thoughts and prayers are with you and your family.

Almost more than any other industry, Solar has seen more than its fair share of volatility...

Coming Up Next

WISE (Women in Solar Energy) @ Cobb EMC. More details to come.

Join us for lunch, discussion, and networking while we Celebrate Georgia's Women in Solar!

Information on the COVID-19 stimulus packages has been coming out rapidly. So far Congress has passed three pieces of legislation and there are talks of a fourth and fifth coming. For our members who may be having a hard time keeping up with all this we wanted to provide a high-level overview and let you know where to get the details.

Your donations - both small and large - to GA Solar supports our efforts to extend the benefits of solar energy to all Georgians and keep our solar industry strong.

Savannah, Georgia, commits to 100% green energy by 2050 despite coronavirus

Savannah becomes the fifth Georgia city to commit to reaching 100% renewable energy by 2050. It joins Athens, Atlanta, Augusta, and Clarkston in their commitment to net zero.

After COVID-19, Here Comes More & Better Farming With Solar Panels

Solar panels are sprouting on farmland like mushrooms after the rain, but there's no such thing as a free lunch. If too many solar panels replace too much cropland, there goes the food supply. However, farmers are beginning to learn how to do their farming within solar arrays, and in a new green twofer, solar arrays could actually help push the regenerative agriculture movement into the mainstream.

Funding Opportunity Announcement

On April 6, 2020, the U.S. Department of Energy [announced \\$4.5 million in funding](#) for training programs that target professionals who are newly interacting with distributed energy resources (DER), such as solar energy systems, energy storage systems, efficient building technologies, and alternative-fuel vehicles.

This program will provide educational materials and training resources for first responders, safety officials, and building managers and owners so they can be prepared to manage new energy technologies and continue their work safely and effectively.

Coronavirus Is Forcing Home Solar Companies to Sell Virtually. Maybe That's a Good Thing.

Kitchen-table sales are out. Zoom meetings and “social canvassing” on Facebook are in. Residential solar companies adjust to life in a pandemic.

you **select "Georgia Solar Energy Association" as your charitable organization.**

AmazonSmile is the same Amazon you know. Same products, same prices, same service and works with Amazon Prime.
